matter.

We make your markets work

# Deutsche Börse Group – One of the World’s Most Advanced Market Operators

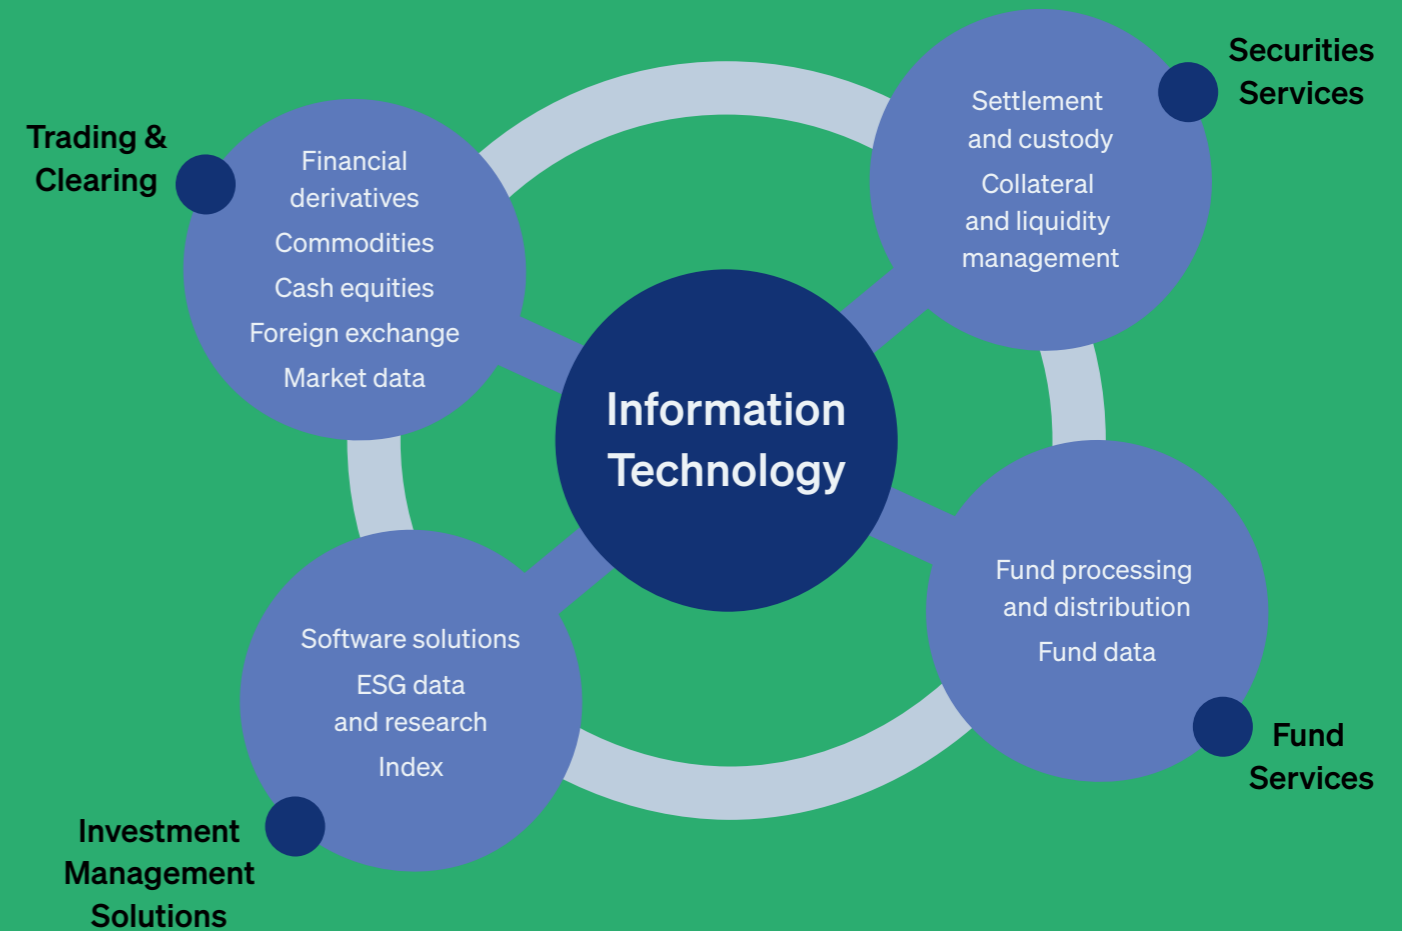

## Deutsche Börse Group – A global market operator

Deutsche Börse provides a comprehensive suite of services to market operators worldwide. Our portfolio extends from setting up and running cash, derivatives, energy and commodity markets, to providing services for their operation.

Deutsche Börse is a provider of financial services infrastructure and one of the largest exchange organizations worldwide. Our vertically integrated business model facilitates the provision of an outstanding product and service portfolio to our customers. With our trading, clearing and settlement solutions, we cover the entire value chain for

capital markets. Our product portfolio also includes a broad set of offerings related to trading infrastructure services, market data dissemination, index calculation, clearing and collateral management, settlement and reporting.

In addition to operating extremely reliable, highly secure and recognised exchange systems, we provide a selection of hosted managed services that allow clients to operate their IT systems and business applications in a reliable and fully compliant manner, meeting the high standards of the financial service industry.

## Providing financial infrastructure services with a comprehensive product range

## We make your markets work

### Deutsche Börse Group Market technology solutions – We make your markets work

As an experienced developer and operator of market technology and infrastructure for more than 25 years Deutsche Börse Group offers the operation of markets for its clients using state-of-the-art market technology and highly scalable global infrastructure.

Leveraging our scalable technology, Deutsche Börse Group redeploys existing platforms and infrastructure and offers them “as-a-service” to their clients. Most notably, we utilize the “7 Market Technology” series, a first-class global IT infrastructure offering. The offering comprises T7 (our cash and derivatives trading platform), C7 (derivatives clearing platform), N7 (network) and M7 (multi-asset class trading platform focused on energy and commodities). In total, Deutsche Börse Group operates approximately 20 markets across the globe.

Assisting clients to  
develop and enhance  
financial markets with  
increased agility

## A Strong Footprint in Technology Outsourcing Services

### Leveraging Deutsche Börse Group's scale

The business area Functionality & Partner Exchanges promotes the Group's extensive service offering in relation to external technology and connectivity services. We leverage our scalable technology from the Group's trading venues for partner exchanges like Vienna Stock Exchange. We offer:

- Trading platform solutions
- IT hosting and managed services
- Scalable, secure, and compliant infrastructure
- Market data dissemination and index calculation

### Licensing T7

The T7 trading system, developed by Deutsche Börse Group and used internally for its own markets Eurex and Xetra, is available for external licensing.

Partner exchanges such as the Bombay Stock Exchange operate their markets based on T7, the core system enabling trading. They make use of the high-performance, low-latency trading system designed for high-volume and high-speed trading and adapt it to their needs.

# We make your markets work

## Exchange solutions – Flexible and efficient trading systems

Deutsche Börse Group offers a comprehensive range of outsourcing services to exchange organizations, multilateral trading facilities (MTFs) or companies with the need of trading solutions.

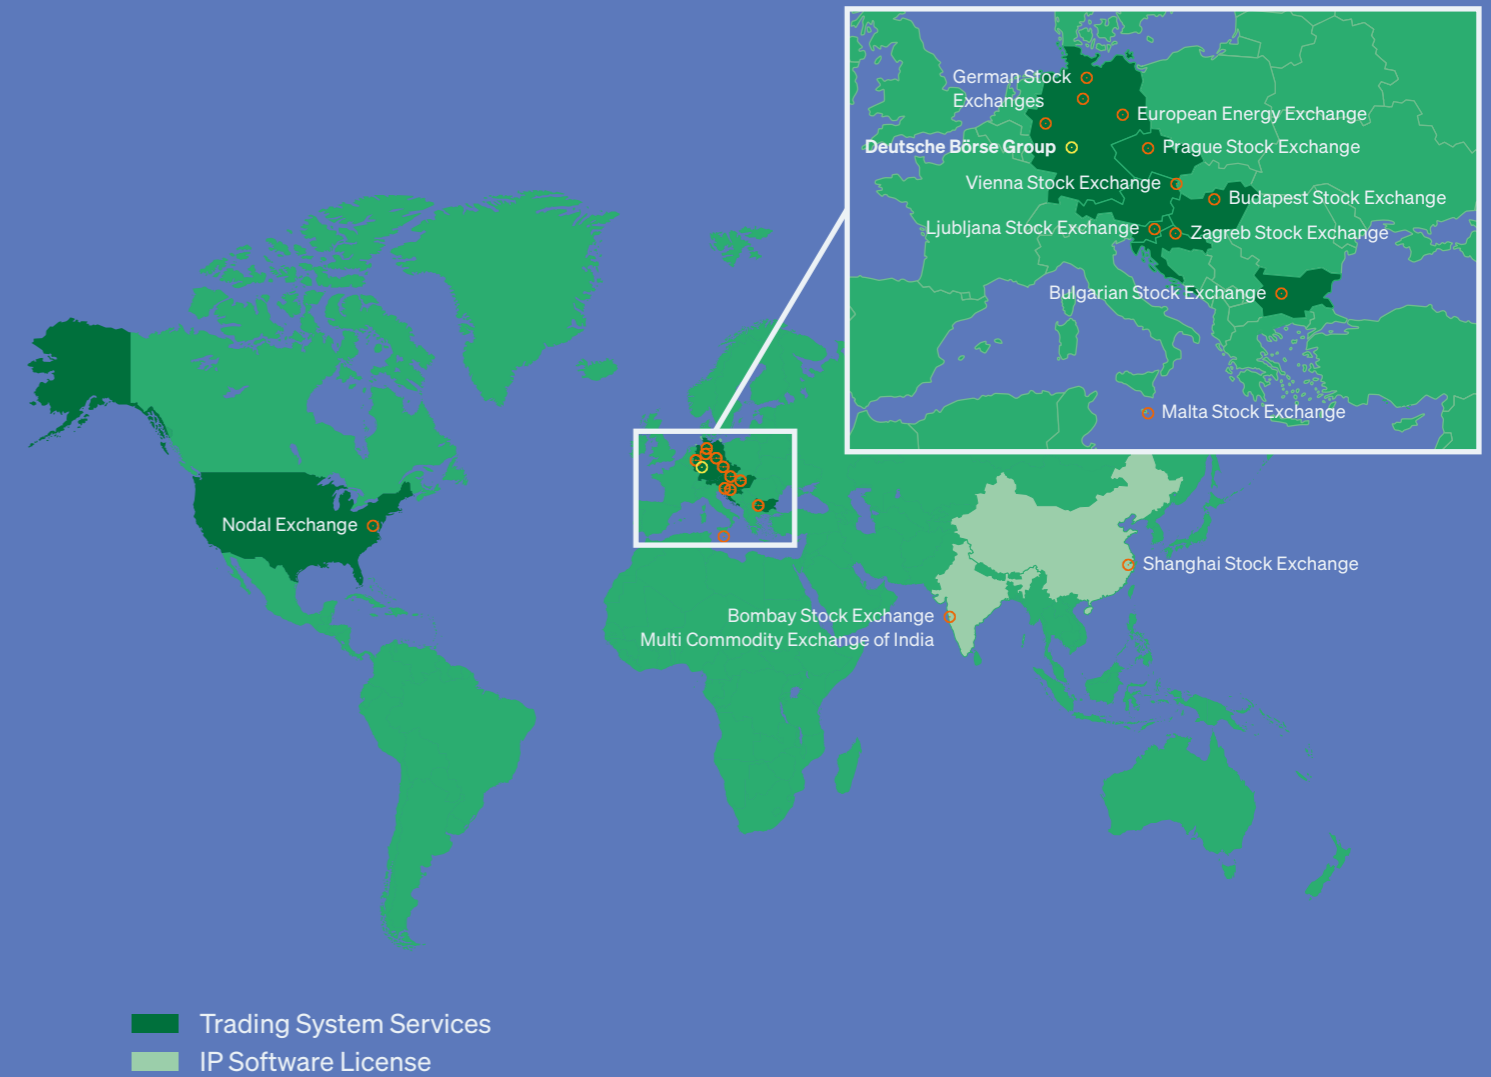

Today approximately 20 market operators worldwide utilize Deutsche Börse's technology and outsource IT and operations to us. We provide our customers with flexibility and efficiency of trading systems and their operation.

Our customers, such as the Bulgarian Stock Exchange, Malta Stock Exchange or Wiener Börse AG, appreciate our extremely high-quality standards.

Besides offering trading, clearing and settlement system infrastructure services, our clients benefit from a broad set of outsourcing services: market operations (cash and derivatives), market supervision, trading surveillance, index calculation, market data dissemination, network management and IT hosting.

# Scalable solutions. Stronger markets.

## Deutsche Börse Group: a global network of partners and expanding geographic presence

State-of-the-art market technology and highly scalable global infrastructure

## Deutsche Börse partnerships – Cooperations with mutual benefits

Deutsche Börse's trading technology is continuously developed and already used by several exchanges worldwide.

### Partnership examples

Partner	Description
	State-of-the-art trading system and integrated network to the customers, combined with the necessary stability and reliability, are today's prerequisites for a successful exchange. With T7 clients meet this challenge at low costs, so that exchanges of different sizes, like partner exchanges in Central, Eastern and Southern Europe, can afford cutting edge technology.
	Prague Stock Exchange ) migrated to the T7 electronic trading platform in 2019. Fully managed network service for connecting to the global markets of partner exchanges in Central, Eastern and Southern Europe.
	Budapest Stock Exchange <sup>1)</sup> migrated to the T7 electronic trading platform in 2019.
	Ljubljana Stock Exchange <sup>1)</sup> migrated to the T7 electronic trading platform in 2019.
	Migration to the T7 trading platform meets client demands and brings the ZSE <sup>1)</sup> within reach of the global trading community adding transparency and market liquidity for ZSE listed issuers.
	In a mutually beneficial partnership with the Bulgarian Stock Exchange, the fundamental operating services such as market supervision, market data dissemination, index calculation and market supervision are rendered from Frankfurt.
	The Malta Stock Exchange migrated to the T7 electronic trading platform in 2019. Deutsche Börse distributes two Malta Stock Exchange information products: Malta Stock Exchange and Malta Stock Exchange Post Trades.
	Xetra's highest level of technology forms the basis for Shanghai Stock Exchange, one of the largest stock exchanges worldwide.
	Licensing of state-of-the-art T7 trading platform to the Bombay Stock Exchange.
	The German Stock Exchanges are going to migrate to T7 trading platform in 2026.
